Rating vs Reviews

Top Rated Apps (Minimum 50 Reviews)

	App	Category	Installs	Rating	Reviews
1.	CL REPL	TOOLS	1,000	5	47
2.	AJ Cam	PHOTOGRA...	100	5	44
3.	AI Today : Artificial Intelligenc...	NEWS_AND...	100	5	43
4.	Ek Vote	PRODUCTIV...	500	5	43
5.	CS & IT Interview Questions	FAMILY	1,000	5	43
6.	Quran Khmer Offline AY	FAMILY	1,000	5	41
7.	FK Dedinje BGD	SPORTS	100	5	36
8.	CL Notifier	TOOLS	100	5	36

Key Insights:

- Categories with the highest average ratings indicate strong user satisfaction.
- Apps with more reviews often maintain strong ratings, indicating consistent user experience.
- Most apps are concentrated in the higher rating bands.
- Highly rated apps can serve as benchmarks for future app development.

Relationship Between Ratings VS Installs

Install Distribution

Most Installed Apps

	App	Category	Installs	Rating	Reviews
1.	Ek Bander Ne Kholi Dukan	FAMILY	10,000	5	10
2.	Superheroes, Marvel, DC, C...	COMICS	5,000	5	34
3.	CL Keyboard - Myanmar Key...	TOOLS	5,000	5	24
4.	CL REPL	TOOLS	1,000	5	47
5.	CS & IT Interview Questions	FAMILY	1,000	5	43
6.	Quran Khmer Offline AY	FAMILY	1,000	5	41
7.	GKPB FP Online Church	LIFESTYLE	1,000	5	32
8.	Eternal life	LIBRARIES_...	1,000	5	26

Key Insights:

- A small number of apps account for a large share of total installs.
- Categories with the highest installs indicate strong market demand.
- Highly installed apps generally maintain strong ratings and engagement.
- Understanding install patterns helps prioritize future app development and marketing efforts.

Price Distribution of Paid Apps

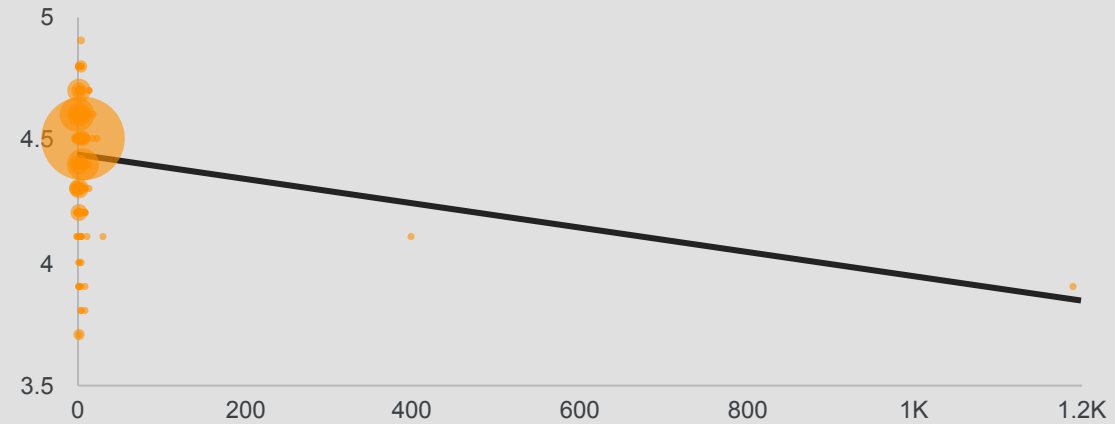

Paid Apps by Category

Price VS Reviews

Price VS Rating

Key Insights:

- Free apps dominate the Google Play Store ecosystem.
- Paid apps are concentrated in specific categories.
- Higher prices do not necessarily guarantee higher ratings.
- User engagement tends to be influenced more by app quality and value than price alone.

App Updates Over Time

Android Version Distribution

Key Insights:

- App size varies significantly across categories.
- Most apps were updated in recent years, showing active maintenance.
- Larger apps do not always achieve higher install counts.
- Android version requirements reveal the platform compatibility strategy of developers.
